

# AAUW Research Reports

*Changing the conversation about equity for women and girls.*

## ***Shortchanging Girls, Shortchanging America. (1991) and The AAUW Report: How Schools Shortchange Girls (1992)***

Based on a nationwide poll of students ages 9-15 examining the impact of gender on self-esteem, career aspirations, educational experiences, and interest in math and science, the report includes concrete strategies for change and recommendations for educators and policymakers.

This report was one of the first to raise the issue of how girls are treated differently in the classroom, and how to make changes for the benefit of all.

## ***Crossing the Line: Sexual Harassment at School (2011)***

Based on findings from a nationally representative survey conducted in May and June, 2011, this report presents the most comprehensive research to date on sexual harassment in grades 7-12 and reveals some sobering statistics about the prevalence of sexual harassment and the negative impact it has on students' education.

The report concludes with concrete recommendations and promising practices for preventing sexual harassment

## ***Behind the Pay Gap (2007)***

## ***The Simple Truth about the Gender Pay Gap (2011)***

*Behind the Pay Gap* examines the gender pay gap for college graduates. One year out of college, women working full time earn only 80 percent as much as their male colleagues earn. Ten years after graduation, women fall farther behind, earning only 69 percent as much as men earn.

Also download the shorter *Simple Truth* for a brief, accessible discussion of the issue.

## ***Why so Few? Women in Science, Technology, Engineering, and Math (2010)***

In an era when women are increasingly prominent in medicine, law and business, why are there so few women scientists and engineers? A new research report by AAUW presents compelling evidence that can help to explain this puzzle. *Why So Few? Women in Science, Technology, Engineering, and Mathematics* presents in-depth yet accessible profiles of eight key research findings that point to environmental and social barriers that continue to block women's participation and progress in science, technology, engineering, and math.
